Calculating scholastic average for Infosys Recruitment Process

Please follow the instructions shared below to calculate your scholastic average as per our requirements.

- We need simple average/aggregate percentages for education details of X Standard, XII Standard (if applicable), and Diploma which includes:
    o All Languages
    o Additional Subjects
    o Practical
    o Optional Subjects

   The formula for calculating simple average/aggregate percentages is:

   $$\frac{\text{Total marks obtained in all subjects}}{\text{Total maximum marks for all subjects}} \times 100$$

Here is an example of how you can calculate a simple average/aggregate:

	Marks obtained	Maximum marks
Subject 1	60	100
Subject 2	73	100
Subject 2 Practical	26	50
Subject 3	82	100
Subject 3 Practical	52	100
Optional	77	100
Additional Subject	48	75
Total	**418**	**625**
Simple Average/Aggregate = 418/625 = 66.88%		

- If your college/institute/university follows a CGPA system, please ensure that the CGPA is calculated considering every course/subject/elective that you have undertaken in that academic year including optional or additional subjects (if any).
