

**UTKALMANI GOPABANDHU INSTITUTE OF ENGINEERING**

**DEPARTMENT OF MECHANICAL ENGINEERING**

**(2022-2023)**

**LESSON PLAN**

|  |   |   |
|--|---|---|
| <b>Discipline:</b><br>Metallurgy                     | <b>Semester:</b><br>3rd                   | <b>Name of the Teaching faculty:</b> Amit Kumar Marandi   |
| <b>Subject:</b><br>Elementary Mechanical Engineering | <b>No of Days/ Week class allotted:</b> 4 | <b>Semester from Date:</b> 15/09/2022 <b>To Date:</b> 22/12/2022<br><b>No of weeks:</b> 15                                |
| <b>Week</b>  | <b>Class Day</b>                          | <b>Topics</b>   |
| <b>1st</b>   | 1st                                       | Define shear force and bending moment.  |
|  | 2nd                                       | Construct shear force and bending moment diagram of simple supported beam with point load.                                |
|  | 3rd                                       | Construct shear force and bending moment diagram of simple supported beam with uniformly distributed load.                |
|  | 4th                                       | Construct shear force and bending moment diagram of cantilever beam with point load.                                      |
| <b>2nd</b>   | 1st                                       | Construct shear force and bending moment diagram of cantilever beam with point load.                                      |
|  | 2nd                                       | Construct shear force and bending moment diagram of simple supported beam with point load and uniformly distributed load. |
|  | 3rd                                       | Construct shear force and bending moment diagram of cantilever beam with point load and uniformly distributed load.       |
|  | 4th                                       | Determine stress of loaded beams.   |
| <b>3rd</b>   | 1st                                       | Determine stress of loaded beams.   |
|  | 2nd                                       | Determine stress of loaded beams.   |
|  | 3rd                                       | Define machine, mechanism, kinematics, link, kinematics pair, kinematics chain.   |
|  | 4th                                       | Define machine, mechanism, kinematics, link, kinematics pair, kinematics chain.   |
| <b>4th</b>   | 1st                                       | Define machine, mechanism, kinematics, link, kinematics pair, kinematics chain.   |
|  | 2nd                                       | Illustrate four – bar linkage, crank – connecting rod, quick return mechanism.  |
|  | 3rd                                       | Illustrate four – bar linkage, crank – connecting rod, quick return mechanism.  |
|  | 4th                                       | Illustrate four – bar linkage, crank – connecting rod, quick return mechanism.  |
| <b>5th</b>   | 1st                                       | Understand function of a cam and cam follower.  |
|  | 2nd                                       | Understand function of a cam and cam follower.  |
|  | 3rd                                       | Determine the length of open belt drive.  |
|  | 4th                                       | Determine the ratio of tensions and power transmitted by belt drive.  |
| <b>6th</b>   | 1st                                       | Determine the ratio of tensions and power transmitted by belt drive.  |
|  | 2nd                                       | Discuss advantage of rope and chain drive.  |
|  | 3rd                                       | State working principle of simple brake and dynamo meters.  |
|  | 4th                                       | State working principle of simple brake and dynamo meters.  |
| <b>7th</b>   | 1st                                       | Define and classify bearings (bush and anti-friction).  |
|  | 2nd                                       | Define and classify bearings (bush and anti-friction).  |
|  | 3rd                                       | Define heat and work and derive inter – relationship.   |
|  | 4th                                       | Determine work done by compression and expansion of gases.  |

|             |      |  |
|-------------|------|--|
| <b>8th</b>  | 1st  | Determine work done by compression and expansion of gases.   |
|             | 2nd  | Explain properties of steam (sensible, latent heat & dryness fraction).  |
|             | 3rd  | Discuss use of steam tables.   |
|             | 4trh | Discuss use of steam tables.   |
| <b>9th</b>  | 1st  | Explain the functions of the boiler.   |
|             | 2nd  | Explain the functions of the boiler.   |
|             | 3rd  | Explain the functions of the boiler.   |
|             | 4trh | Define fire tube, water tube, boiler.  |
| <b>10th</b> | 1st  | Define fire tube, water tube, boiler.  |
|             | 2nd  | Define fire tube, water tube, boiler.  |
|             | 3rd  | Define and classify steam turbines (impulse and reaction type and steam condensers).                               |
|             | 4trh | Define and classify steam turbines (impulse and reaction type and steam condensers).                               |
| <b>11th</b> | 1st  | Define and classify steam turbines (impulse and reaction type and steam condensers).                               |
|             | 2nd  | Define and classify steam turbines (impulse and reaction type and steam condensers).                               |
|             | 3rd  | Define and classify internal combustion (I.C.) engine.   |
|             | 4trh | Explain Otto and Diesel cycles.  |
| <b>12th</b> | 1st  | Explain Otto and Diesel cycles.  |
|             | 2nd  | Explain and compare 2 stroke and 4 stroke and I.C. engine.   |
|             | 3rd  | Define Indicate power, brake power and mech, efficient.  |
|             | 4trh | Define Indicate power, brake power and mech, efficient.  |
| <b>13th</b> | 1st  | Define Refrigeration and Air – conditioning and state various application.   |
|             | 2nd  | Explain simple vapour compression refrigeration system.  |
|             | 3rd  | Explain simple vapour compression refrigeration system.  |
|             | 4trh | State types of refrigerants and explain their properties.  |
| <b>14th</b> | 1st  | Describe the basic concept of air – conditioning with reference to a room air conditioner.                         |
|             | 2nd  | Describe the basic concept of air – conditioning with reference to a room air conditioner.                         |
|             | 3rd  | Define machine tools.  |
|             | 4trh | Define machine tools.  |
| <b>15th</b> | 1st  | Describe different machine tools and their functions (lathe, drill, shaper, milling machine and grinding machine). |
|             | 2nd  | Describe different machine tools and their functions (lathe, drill, shaper, milling machine and grinding machine). |
|             | 3rd  | Brief idea on CNC milling and CNC Turning.   |
|             | 4trh | Brief idea on CNC milling and CNC Turning.   |

| Learning Resources: |                                    |                                    |                   |
|---------------------|------------------------------------|------------------------------------|-------------------|
| Sl.No               | Title of the Book                  | Name of Authors                    | Name of Publisher |
| 1.                  | Strength of material               | R.S.Khurmi                         | S.Chand Publisher |
| 2.                  | Engineering Thermodynamics         | P.L.Ballaney                       | Khanna Publisher  |
| 3.                  | Refrigeration and Air Conditioning | R.S.Khurmi                         | S.Chand Publisher |
| 4.                  | Theory of Machine                  | R.S.Khurmi                         | S.Chand Publisher |
| 5.                  | Basic Mechanical Engineering       | Dr.N.R.Banapurma<br>Mr.V.S.Yaliwal | Vikas Publisher   |
